

2021 EXAM RESULTS

3Dimensions

Our students have constantly strived to achieve the very best way they can, in an extremely difficult school year.

Students have earned ASDAN awards through courses designed to teach them independent skills and personal development. Silver awards have also been achieved.

ASDAN allows young people to experience many different subjects, teaching them a comprehensive range of skills that serve our students going forward into adult life.

We have also been proud to have students register this September for college courses, where we are happy to watch them progress into the next stage of their education and beyond.

All our students continue to improve their skills, year on year. This is both academically and personally, with our students constantly breaking down the barriers to their learning.
